Subject: RE: Dedication of land for Highways

Afternoon Guy

Thank you for your emails in relation to the strip of land adjoining the north west corner of site reference SH1. I have spoken with relevant colleagues within highways and can confirm that this area of land has been dedicated as highway. The indicative plans for the site you have shared do not show any alteration or use for that area of land and as such I do not believe this will result in a constraint. Please note these comments are in relation to that small section of land dedicated as highway only and not the development proposals.

I have requested that the NYCC draft highway extents be updated to include this area of land as indicated in the dedication of land agreement you shared.

Many thanks

Abi
